COMPANY PROFILE

About Us

Starzs Gas Limited is an energy firm that was set up to develop and operate an Integrated Gas Facility that will contribute to the development of the domestic gas market in Nigeria and operates within the Oil & Gas industry as part of the Starzs Group, a conglomerate that offers; maritime logistics, fabrication and marine asset management.

The establishment of this subsidiary company is premised on the 2020 declaration by the Federal Government (FG) of Nigeria which declared the next ten years as the Decade of Gas that showed the FG's commitment to enable the penetration of the domestic gas utilization around the country to drive industrialization, increased access to affordable power, and reduce the country's carbon footprint through the adoption of compressed natural gas as auto fuel.

As a company, Starzs Gas has a commitment to sustainability with a maximum impact which is why our Integrated Gas Facility cuts across the gas value chain with a focus on Gas for Power, Gas for industrial applications and Gas as Auto Fuel. Starzs Gas is also involved in EPC projects within the gas sector.

VIRTUAL PIPELINE: We bring gas beyond the pipelines

When it comes challenging terrain, long distances or the lack of large consumption centers, the installation of conventional pipelines becomes unfeasible. Under these conditions, the Virtual Pipelines connect consumers to the gas network last miles.

The Starzs Gas Virtual Pipeline connects consumers with several gas sources, surpassing the reach of conventional pipelines and providing energy to isolated regions. This technology allows to compress and transport gas by road and to deliver it at the right pressure and according to the demand from the consumers.

Administrative Headquarters

15c Omerelu Street, GRA Phase 1, Port Harcourt, Rivers State, Nigeria.

Lagos Office

OUR PEOPLE

All matters relating to employment, appointments and personnel development are treated on an equal opportunity basis, with gender, race, age, religion and status given high priority as we balance the roll call.

Starzs Gas is able to work with clients to conceptualize ideas, design the ideas and form structures on the back of the assumptions developed to actualize such conceptual ideas, without any deviation to design and established functions.

OPPORTUNITIES

One area of continuous interest to Starzs Gas is playing a central role in the development, management and operations of energy infrastructure within Nigeria. This has invariably witnessed to acquisition of manpower skills and the required training to undertake the componential and turnkey execution of projects such as pipelines, processing plants, production systems, etc., in partnership or as standalone.

The objective of including this focused area in the company's bouquet of activities/offerings, is basically to share the enormous value that the company possesses with its clients and the general Nigerian public.

ORIENTATION

As a company, we strive to always give a timely and high quality best in class orientation to our personnel during planning, design development, mobilization to site, actual work execution, project commissioning, project handover and demobilization. We ensure that there is a seamless understanding and ownership taking of responsibilities ahead of deployment to execute projects. This is to enable the personnel adopt a mindset of how important the project is to the company and the client, while also making sure that the completion benefits are in alignment with their individual benefits.

Starzs Gas is a company of choice based on its pedigree and the strength of its capacity as a single entity and also as part of a Group. The relationships the Group has maintained over the past 30 years or more with the IOCs remains a testament to its sustainable business practice.

STAKEHOLDERS

Our stakeholders comprise host communities, public institutions, and members of the business community.

The host communities within our present and future areas of either temporal or permanent operations come at the top of our stakeholder list and priorities. Whether such communities are already fulfilled or lack the basics, we constantly include them in our decision-making processes and social responsibility causes.

Public institutions refer to the regulatory and statutory agencies that guide and supervise our business operations. This group of stakeholders have continued to support our businesses and the entire business interests of our Group. They matter to us as much as the industry they steer. We always recognize their importance in our decisions and to a large extent, carry them along as we take each and every step of action.

Members of the business community include the IOCs, NNPC Limited ("NNPC") and a host of independent and local entities, who operate in the Nigerian Oil and Gas Industry. They shape the marketplace and breathe life into the formation of a credible and competitive atmosphere for all players to freely innovate and deliver value in their designated segments. As Starz Gas, we leverage the benefits that our Group affiliation provides to participate in the Oil and Gas Industry. These benefits enable us to streamline activities with ease, extend affordable service and enter into collaborations with other players.

HEALTH, SAFETY, SECURITY & ENVIRONMENT (HSSE)

Our heritage is principled for consistency. We follow a uniform approach within the entire Group. This has seen us adopt the same HSSE protocol and guidelines across all the companies in the Group and as a result, minimizing our exposures.

STARZS GAS LIMITED recognizes the paramount importance of the safety of her employees, clients and the general public. The Company is committed to conducting all her business and operations in a healthy and safe manner by consistently applying safety practices and ensuring that the rules and guidelines covering all aspects of our operations comply with our clients' standards while we obey all Government rules and regulations affecting our business and operations.

At Starzs Gas, safety means professionalism. No job is so urgent that we cannot take time to do it right, first time, all the time and safely.

A detailed HSSE manual and incident reports are available upon request.

QUALITY ASSURANCE & QUALITY CONTROL

When it comes to adherence to and delivery of quality jobs, experience plays a major role at Starzs Gas. We have continued to improve our performance levels through the adoption of "Kaizen" technique.

Our processes are well defined and the metrics we use in measuring our performances have also been standardized. As we strive to become internationally recognized and deliberate in our levels of transparency, client engagements and adherence to the laws in our environment.

Our QA/QC manual is fully compliant with ISO 9001:2015 standards and it applies to all STARZS GAS activities.

A detailed QA/QC manual and improvement list are available upon request.
